

Sprint: 04-03-2019

Stories	To Do	Doing	Testing	Pls Help
Have a fully implemented veg meal. Need 1 2 & 3 for this				
1 Can send data from client side to database	1.1 Make prepared statements for the query			
	1.2 Intergrate database with server			
	1.3 Make sure everything is streamlined from client to server			
	1.4 "GUI" for food and veggie			
2 user log in	2.1 user has to be able to input name and password. 1x only			
	2.2 make sure user can only give normal chars in username			
	2.3 GUI for the log in			
	(2.4 make sure password gets saved safely)			
3 The little things	3.1 change java JDK from 11.0 to 8.0 so we can use javeFX			
	3.2 make sure everyone has a			

	correct pom file.			
	3.3 merge “all” branches into master			
	3.4 Have meetings throughout the week
