

Backlog

Stories	To Do	Doing	Done	Panic Help
Branch coverage			Test requests	
			Test calls to private methods	
			Make sure the testing framework ignores the GUI for coverage (and then reach approx. 100%)	
API carbon calculator		Get to know API for carbon footprint		
	Implement this API for the categories			
CI			Get CI to work and test checkstyle and jacocco coverage	
History method			Fix the history method	
Leveling system			Leveling system GUI	
			Request total points from DB	
			Determine level method	

--	--	--	--	--

Eyup

- Reconstructed the database to use usernames instead of tokens to check stuff
- Changed the methods involving dates and times to something easier to work with
- Fixed small stuff involving database methods

Shruti

- Made server to client and client to server side
 - For adding friends
 - For getting history of a user

Erwin

- Looked into API stuff
- Coolclimate setup for our application
- investigated another API because CoolClimate could be the wrong API for us (discuss monday)
- Did the Information Literacy

Gyum

Check the api is fully worked in our app

Use the test method to test the demo is fully work

Made the user literacy

Marko

- Methods for friend management on client in Communication class
 - add friend, get friends, get followers
 - also did "get followers" on database
- Wrote tests for all sorts of stuff
 - packages: client, gogreen, server, (database)
- Did light improvements all over the places

Elias

Marit

- Made the leaderboard GUI
- Made the friends GUI
- Fixed some small GUI buttons
- Started the information literacy
