1 Notes

1.1 General remarks

What we did last week?

- Make a database (eyup) – Database include id, still need to figure the place to store the information. (Demo version)
- Finish the API part – Finish food, energy, extra category has finished. Still need to fix the small bugs.
- Server side – try to do the communication with server and client. need to find the way to combine with database.
- Overall as a team – give feed back with teammate.

What we need to do next week?

- Database – figure the place to store the information.
- API – delete the mistake of the time reset. Also, need to fix some small part of code.
- Combine server and database is hard, we need to find the efficient way to produce.
- Change java JDK 11.0 to 8.0

Team evaluation

- We need to march only useful information. On Saturday upload your thing for see the progress of the project.

Davis is on vacation this week, so he'll respond less. Still a deadline for Saturday.

Next goal for 2nd DEMO

- Finish the category
- Combine the entire database and server
- Make sure all the files can march and branch.
